

Julia P. Ewald

Associate Biologist

Julia obtained a Bachelor of Science in Wildlife Biology from the University of North Dakota in 2014. She has a strong background in ornithology and botany, particularly flora of the Great Plains. While in North Dakota, she spent two years studying sharptailed grouse in the Bakken Oilfield of Western North Dakota.

Since then, she spent almost three years as a research assistant at the University of Nebraska-Lincoln studying greater prairie chickens, sharptailed grouse, and songbirds in the Sandhills as well as teaching undergraduate classes in wildlife techniques and waterfowl/wetland ecology at the University. She has presented parts of her research to the Society for Range Management and The Wildlife Society

Julia bring a new perspective and skill set to the New Century team. Among her strengths are technical writing, statistical and geospatial software proficiency, and navigating the logistics of field work.

She is particularly interested in helping developers be successful in undertaking important projects by providing support with land stewardship goals and compliance with environmental regulations. She also enjoys working with farmers and ranchers cultivate wildlife habitat while keeping the business side in mind.
