

ENERGY DEVELOPMENT ENVIRONMENTAL COMPLIANCE EXPERTISE

New Century Environmental has cutting-edge expertise in bird and bat monitoring/analysis. NCE uses state-of-the-art equipment and techniques to provide cost effective compliance solutions to regulatory demands. With production tax credits available on the horizon, NCE is geared up and ready to go in Spring 2016. We have some of the best bird and bat experts found anywhere.

New Century Environmental has worked in a variety of eco-regions. Members of the biological staff are experts in the use full spectrum, high fidelity, passive terrestrial ultrasonic recording devices and the computational analysis of bat calls. These techniques give clients a non-invasive (no incidental take) alternative to mist netting to determine the diversity and abundance of bats located within a project area, and dramatically lowers costs to clients.

NCE also has broad experience and great expertise in conducting bird surveys by industry standard methodologies, and in accordance with state and federal regulatory guidelines. At this time, there is no automated, high-tech methodological alternative to the expert's eye and ear and field experience for bird studies, but NCE can nonetheless produce a least-cost solution for almost all clients' bird monitoring needs.
