

Wetland Ecology and Compliance--Industrial, Municipal, Recreational and Agricultural

New Century Environmental (NCE) has expertise in wetland determination, delineation and mitigation site development. NCE manages approximately 4 million acres of Native American reservation land and is involved with riverine, lacustrine, isolated and palustrine wetlands across the Great Plains in these locations.

Some areas of NCE expertise:

- Formal Determinations and Delineations Permit Assistance - Section 404 (CWA)
- Wetland Functional Assessment Evaluation: *NCE has conducted functional assessment reviews of approaches to implement for the Nebraska Department of Roads since 2012.*
- Sensitive and Rare Flora Surveys; complete botanical inventories
- Wetland Mitigation Plan, Design, Implementation and Monitoring
- Complete restoration and enhancement services
- Aquatic plant surveys, mapping and control/development
- Invasive species inventory and control
- Range / Vegetation Surveys and Habitat Mapping
- Landscape Ecology / Habitat Structure Ecological Modeling
- Riparian Habitat Restoration and Monitoring Aerial Photographic Analysis

New Century Environmental LLC appreciates the opportunity to support you in every way possible with your wetlands, and we fully guarantee the highest quality, cost effective work in the industry. NCE staffs professional and certified wetland scientists with diverse experience across North America. Our wetland scientists are certified to conduct surveys for threatened & endangered species, vegetation surveys, rare plant inventories, wetland delineations, and riparian corridor assessments.
